Lancaster Farming

VOL. 7 NO. 46 Lancaster Farming, Saturday, October 20, 1962 $2 Per Year

BEEF COMES OUT OF THE PIT READY TO EAT, and hungry citizens of southern Lancaster County soon took care of seeing that it was eaten Here the committee from the Solanco Fair board examines one of the first roasts Left to right are committee chairman Jason Weaver, Fair board president, John Hoffman, Fred Linton, Everett Kreider (face in shadow), and Fred Frey. Three hundred pounds of beef was cooked for 12 hours over a bed of coals in the pit covered with roofing and soil. L. F. Photo.

Vegetable Growers Reject Proposed Market Co-op

Vegetable and fruit growers of the county turned thumbs down on the formation of a proposed marketing cooperative Wednesday night

Meeting in the auditorium of the Farm Bureau cooperative, the growers unanimously opposed the forming of a cooperative to market more than one commodity Individuals in the group expressed the desire to see some kind of marketing arrangement between producers of some particular commodities

Grower sentiment, as expressed in the meeting was overwhelmingly opposed to the idea despite the obvious urging of H H (Chick) Brody, a vegetable broker who had requested the county extension service to call the meeting.

Paul Rowe, president of the Lancaster County Vegetable growers association made it clear from the beginning that the producers had not requested the meeting but were there by invitation

John Gauss Farmer Cooperative Specialist from the Pennsylvania State University led off the discussion by outlining four basic essentials of a cooperative He said there must be an economic need and a demand and asked "What can a cooperative do for you that you can not now do for yourself?

There must be membership support he continued, explaining that two thirds of all cooperatives formed soon fail because members do not support then organization They

Commissioners Would Initiate Surplus Food Program For County

Lancaster County Commissioners would be willing to initiate a surplus food program for the county if there were enough interest expressed by the local political subdivision officials. Abram Snyder, County Commissioner told members of the Lancaster County Agricultural Council Thursday night

Snyder said there has not been very much enthusiasm for such a program to the present time "We have had no more than four or five inquiries per year" about such a program he said

In nearly all cases the requests have come from persons who have moved into the county from an area where a surplus food program is in operation Lancaster County is

He said he believed the program should be given serious consideration, but that township supervisors and other local subdivision officials would be in a better position to know one of the few in the state without such a program.

Last year more foods were added which make the program more attractive, but there are problems connected with such a program Snyder stated

Snyder said elegibility for the need for such a program.

Barbecued "Beef In A Pit" Cooked By Solanco Fair

Three hundred pounds of beef, and we served every scrap right down to the table top, said John Hoffman as he described the first "pit barbecue" sponsored by the Solanco Fair Association last Saturday.

Volunteers from the fair board were so pleased with the response to their first attempt at this new venture that they are hoping to make it an annual affair. Hoffman, who is president of the board said this week

Several of the local farm fair boards finding it increasingly more difficult to finance the exhibitions, have turned to one or more fund-raising activities outside of fair season. The West Lampeter Fair association has sponsored chicken barbecues for several years. but it appears that Solanco is alone in trying the idea with beef.

Fred Frey, Quarryville R2, a breeder of purebred angus cattle, serving as "pit fore-

Oct. 22-23 — Regional Land and People Conference sponsored by the U S. Department of Agriculture in cooperation with state and local governments Sheraton Hotel, Philadelphia.

Oct 25 — 2 30 p m — York-Lancaster Area Future Farmers of America Leadership Training Conference in the Solanco High School

7 30 — Lancaster County Poultry Association Banquet at Hostetter's Banquet hall in Mount Joy

8 p m. — Halloween party for the combined 4-H dairy clubs of the county, at the Lampeter Community grounds.

Oct. 27 — Eastern District 4-H tractor driving contest at Schuylkill Haven.

Poultry Banquet Date Announced

The annual banquet of the Lancaster County Poultry Association will be held next Thursday at Hostetter's banquet hall in Mount Joy, Joe Wolgemuth, committee chairman said this week

On the program will be Paul F Osborn who will present a color movie with comments on points of interest on his three month trip around the world

Entertainment will be furnished by the Garden Spotters quartette

The meal is scheduled to begin at 6:30 p m on October 25.

Livestock Tour Will Inspect Maryland Farms

Lancaster County's annual livestock tour will take in four stops on the Eastern Shore of Maryland this year County agent Max M Smith said this week

The tour is scheduled to be held on November 1, but any interested person should make reservations with the county agent's office by Monday October 29 Smith said

Stops will include visits at two steer feeding operations, one beef breeding farm and one swine feeding program.

At Andelot Stock Farms, Worton, Md., the visitors will see 300 Angus cows and 100 brood sows on a 3,000 acre

(continued on page 7)

Annual FFA Leadership Training Conference Slated For Solanco

Solanco High School has been designated as the site of the annual York-Lancaster area Future Farmers Leadership training conference

While the officers of the local chapters in both counties will be responsible for most of the program, a panel of girls will also have an opportunity to be heard

Girls who have been elected FFA Chapter Sweethearts will give their views on what they expect from the boys They will express their views on how well they think the boys live up to the theme. "An FFA officer is always a gentleman"

A parliamentary drill will be conducted by Paul Trimbel, Quarryville R1, the state association FFA treasurer, and Clarence Bauman, Lancaster R7, state association sentinel Teachers of vocational agriculture from both counties will conduct practice in Parliamentary practice and public speaking, and will drill the officers in the duties of the office to which they have been elected

Toastmaster at the annual banquet will be Paul Welk, Strasburg R1 president of the Lancaster County association Jerry Snader, Ephrata R1, county chaplain will have the

Dist. Hay Show Date Announced

Dates of the 1962 Southeastern Pennsylvania Quality Forage Conference and District Hay Show were announced this week

The Pennsylvania Grassland Council will begin at 9 a.m. on November 7 and continue through November 8.

Judging of the hay exhibits will begin in the Garage of the Hotel Hershey, Hershey, at 1 p m. on November 6

Hay may be exhibited from the counties of Adams, Berks, Bucks, Chester, Cumberland, Dauphin, Delaware, Franklin, Lancaster, Lebanon, Lehigh, Montgomery, Northampton, Philadelphia, Schuylkill and York.

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average near the seasonal normal of 43 at night to 63 in the afternoon. Temperatures will range slightly above normal over the week end and slightly below normal for the remainder of the period. Precipitation may total ½ inch or less falling mainly as showers about Sunday.

GOOD PROFITS start with GOOD FEEDING!

USE THESE FEEDS!

RED ROSE RUMENATOR—This ration is an excellent booster feed or appetizer for dairy and beef animals of all ages. It supplies high levels of available energy and "vitamin lift" to keep herds in top condition. Red Rose Rumenator improves appetites and increases milk production. Try it!

S-O-S—Replaces hay, ensilage or pasture. Is succulent, palatable and bulky; absorbs water readily and contains more digestible nutrients than wheat feeds. Can be mixed with homegrown grains, too.

Broilers Gain Fractionally

Broiler prices at the Lancaster Poultry Center gained only fractionally during the week. A total of 89,700 broilers in 18 lots changed hands at 16 to 17.6 for a sale average of 16.36. The sale average last week was 16 26.

All broilers on sale were sold. Top lot of 1,500 Indian Rivers at 8 weeks 2 days was consigned by Miller and Bushong, and Paul Livengood, and purchased by Carl B. Risser. Only three per cent of the sales were above 16.5.

One lot of 6,000 pullets brought 21.75, but two lots containing 1,500 pullets at 14 weeks two days failed to sell at the offered price of 19 7 and 21.5. Only one other lot on offer failed to sell; this was a lot of 40 males which did not receive a bid One lot of 100 males brought 7 7.

Three lots of 3,500 roasters crossed the block at 18 7 to 24.9, while three lots of leghorn fowl brought 8.6 and 9 7 for the 2,550 head. One lot of 125 heavy fowl was bid off at 11.8

The complete October 18 sale offered 103,515 head in 30 lots and sold 101,975 head in 27 lots. Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

● Delmarva

Fair Demand; Prices Decline

Prices declined slightly more than a quarter cent in Delmarva during the 24 hour period ending 10 30 Friday morning. A fair demand took the moderate offerings.

Heavy sizes were on the high side of the price range of 15 8 to 17 7 Purchases of 888,400 head at farms were reported during the period, including 503,400 head purchased of 516,500 head offered at the Thursday auction at the Eastern Shore Poultry Growers Exchange

Ready to cook demand was slightly improved from a slow to a mostly fair position with practically no processing plants operating Saturday.

Eastern Shore processors estimate slaughter at 699,000 head compared to the 812,000 head last week end

The Delmarva broiler-feed ratio for the week ending Oct 12 was up a point from the previous week at 3 3 Broilers averaged 15 67 cents a pound and mash cost the grower $94 74 per ton The ratio for the comparable week a year ago was 2 9 when broilers brought 12 88 and mash cost $88 95 per ton.

From Where We Stand . . .

Why Does It Have To Happen?

Day by day we wait for the first report to come in hoping that maybe this year it won't come, but knowing full well it is only a matter of time until it does come

Every day of corn picking weather brings the inevitable day closer and closer No matter how much we would like to forestall the day, it will come, and with it will come heartaches and suffering for some family.

And it will all come about because some farmer hoped to save 15 seconds

Instead he will spend several days in the hospital and several weeks doing very little farm work — if he is lucky. He might even trade his life for those few seconds he hoped to save.

No matter how many safety articles are written, no matter how many experts lecture on safety, no matter how many guards the machinery companies install, and no matter how many instructions they issue to turn off the power before trying to clear the snapping rolls, someone is going to get a hand caught in a corn picker before this season is over

Don't let it be you We need you on the job more than you need those 15 seconds it takes to shut off the power.

At least that's how it looks from where we stand

★ ★ ★ ★

Hospitality – Plus

We heard of one farm family out in the eastern part of the county who may have hit on a new way to beat the cost price squeeze

During the Dutch Harvest Frolic days last August, the farm wife responded to the Lancaster Tourist Bureau's plea for lists of rooms available for renting to out of town visitors

She said she hoped she might rent a spare bedroom or two for a couple of nights and take in enough money to buy the children some school clothes, but if she didn't get any of the rooms rented, she figured, she wouldn't be out anything

The first city family that came out to look at the rooms were so impressed by the big, old, stone farmhouse that they rented two rooms on sight and were so happy with the $10 per room that she asked, they decided to stay several more days.

Before the season was over, the family had made some new friends, bought new school clothes and had over a hundred dollars cash they didn't count on

With Lancaster County growing every year as a tourist spot, it seems to us there might be a potential for a great deal of this type of people-to-people communication between urban and rural residents.

It seems to us there is an opportunity for developing all sorts of tourist attractions on the picturesque farms of the county.

The attractions could range all the way from converting the whole farm into a sort of dude ranch, to just renting a room on a farm where a weary city dweller could just relax and unwind by feeding the chickens or watching ducks swimming on a farm pond.

And the added bonus of goodwill that could develop between urban and rural people could do more to strengthen this nation than all the top level diplomacy ever proposed

At least that's how it looks from where we stand.

Just Don't Eat

For the obese, that is, for those who worry about it, the time has come There is now a sure-fire method for weight reduction. No fancy diets, just — fasting. That's right, fasting. Simple?

Of course, it really isn't simple at all. But, such a step is favored by Dr. Garfield G Duncan, University of Pennsylvania, who presented a paper on the subject to the annual meeting of the American Medical Assn in Chicago This drastic method is recommended for those with "severe weight problems."

Patients who took part in the study were hospitalized, denied food, but got tea, water, coffee or other beverages without nutritional content After fast periods of from five to 14 days for adults, up to seven days for younger people, the patients were put on diets of 1,900 calories, with occasional one- or two-day fast periods, until normal weight was reached.

We can't imagine anyone getting lost in the crowd of volunteers for such a program, but is is not as painful as it may sound According to Dr. Duncan, the short fasting periods were tolerated better than the low-calorie diets. After the first day, patients lost appetite and enjoyed a sense of well-being during the fast. He cautions, of course, that such a program is like major surgery and not to be undertaken without scientific advice and supervision.

The Livestock Reporter, E. St. Louis, Ill.

Bible Material: Matthew 16 13-17; Mark 10 45, Luke 19 1-10, John 3 16, 6 35 10, Ephesians 3; Philippians 2 5-11

Devotional Reading: Isaiah 40:6-11.

Son of God

Lesson for October 21, 1962

WHAT is there in the Christian religion that marks it as different from any other in the world? We have something or other in common with every religion, to be sure. It has been said that Christian religion and the most barbarous of jungle faiths have more in common than either of these has with atheism. But that is not the point. What do we have that is distinctive, unique, unlike any other religion whatsoever?

Dr. Foreman

The reader will think of the answer at once: Jesus Christ. There is no equivalent of Jesus in any other religion. Alleged "opposite numbers" turn out, on inspection, to bear little resemblance to the Christians' Lord.

Because of the great importance Jesus Christ possesses, the church has thought much and long about Him and has said a great deal. It all grows out of what was said in the Bible about Him. Out of much more that could be said, three points are selected here, for highlighting,—all from the Bible material.

Equality with God

First of all, the church teaches that Jesus Christ is divine. The most usual way to say this in the New Testament is to call Jesus the "Son of God." Now there are three kinds of "sons" of God recognized in the Bible. To repeat what was said in this column last week, at lowest level are all men, all human beings. By creation we are all children of God. But there is a great difference between being a son-by-creation and a son-by-faith-and-love. So the second level is the sonship of adoption, as Paul puts it in Romans 8, the intimate trusting conscious sonship of true Christians. The third level has only one person in it, Christ Jesus our Lord, the Son of God. The writers of the New Testament never (or very seldom indeed) call Jesus God directly; but the church reflecting through many years on what the Bible does say, long ago arrived at the conclusion that whatever it takes to make God God, Jesus Christ has and is. Yet Christ and the Father are not two Gods. The church came near saying that, but after a long debate concluded there cannot be two Gods. Jesus is not a second God, not a substitute or minor God. That is the meaning we see in Paul's saying that Christ was in the form of God, but did not think equality with God was a thing to be grasped.

"He emptied Himself"

Paul goes right on to say that Christ "emptied Himself" and was born in the likeness of men. The writer to the Hebrews goes farther than saying Jesus was "like" men. Christ, he says (Hebrews 2:14) "partook of the same nature" as his human brothers.

In other words, the church declares that not only as divine as the Father in heaven is, He is as human as you and I are. This was not a make-believe, not putting on a costume and pretending to be a man. It was really being a man. The church has never explained how this could be. If we knew how it could be, we would know as much as God knows.

Giver of life

There are many figures of speech in the Bible to indicate one thing: that Christ is the source of spiritual life for all who believe in Him. Jesus called Himself the vine, with His disciples as the branches. He called Himself bread, and water. (Note: He did not say cake; bread and water were then the minimum essentials for food and drink; Christ is not to be regarded as a luxury but as a necessity.) Those who believe in Him have eternal life, now. Eternal life (and this is a noteworthy point) is not merely a longer life. It means (as Saint John uses the words, and Jesus before him) a different quality of life. Mere everlastingness might not be such a good thing. Eternal life is the kind of life which deserves to be everlasting. What Christians are saying, to put a big idea into very small space, is that what Christ came to do was to bring to this earth, to any one who desires it, a new kind of life, so that we may become new persons.

● Vegetable Co-op

(Continued from Page 1)

use the cooperative as a place to sell homeless produce, he said

About 60 per cent of the original capital for the operation of a cooperative must come from charter members, he said in explaining the need for adequate financing

But most cooperatives fail because of poor management, he said

Kenneth R (Barney) Slamp Extension Marketing Specialist from Penn State echoed Gauss comments and said "We as farmers are interested in a cooperative because it means another possible market"

The only way a cooperative will work is if the growers sign a contract — with teeth in the contract — that a certain acreage will be marketed through the cooperative Slamp said

Emerson Kane, a director on the board of the Washington Boro Tomato growers cooperative said he felt that their cooperative had done some good, but he believed the success was due to the marketing of one commodity

Brody again took the floor in an attack on vegetable commission men and chain store buyers He complained bitterly of a processor who reneged on a telephone contract and shouted, "If we had a cooperative that buyer would not be able to get another tomato from this county

When Emerson Kane said a cooperative would be helpless out of Interstate Commerce, Brody asked John Rainey, Director of the Bureau of Markets, Pennsylvania Department of Agriculture to comment on the Perishable Agricultural Commodities act

Rainey said Pennsylvania does not now have a law similar to the federal perishable products law, but, "We are in the process now of drafting a bill with many of the same measures that are in the federal law"

Former Associate County Agent, Harry Sloat drew the only applause of the evening when he said many of the lo-

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Plant Trees and Shrubs

Mid-October is a good time to make shrubbery plantings in southeastern Pennsylvania, many of the evergreens such as yews, box-leaf holly, junipers, spruces, and pines, the shrubs should be moved with a ball of dirt and kept well watered until freezing weather arrives.

To Keep Dairy Herd Away From Acorns

Dairymen who graze their milking herd near oak trees should remember that acorns may be good for hog feed but will reduce milk production in most cows Either keep the herd out of the area or pick up the acorns Experience has shown that cows suffering from too many acorns will drop in milk production and not recover for the current lactation.

To Beware of Frosted Forage

At this time of the year we can expect killing frost; this means that some livestock men should beware of the danger of grazing such crops as sudan grass and the second growth of sorghum mixtures after frost Any of these grasses or sudan grass-sorghum hybrids can be dangerous after frost, they should not be grazed or fed fresh, they may be made into silage and after fermenting for at least three weeks are safe to feed Alfalfa or clover should not be grazed while the frost is on the plants

To Winterize Sheep Flock

The fall of the year is a good time to eliminate both external and internal parasites from the ewe flock The ewes should be treated for stomach worms before going into their winter quarters, also, the treating for ticks or mites is also recommended before winter weather arrives A better lamb crop and a heavier wool clip will be the result of better management this fall.

Vegetable Co-op

(Continued from Page 4)

cal growers have excellent retail outlets which bring top dollar for their produce You can't expect them to give up these retail markets to sell their product through a cooperative

There are not enough producers who consign vegetables to the open market to make a cooperative successful, sloat said He pointed to the county tobacco cooperative as an example of what can happen to an organization that fails to get grower support

Taking a somewhat more favorable view, Clyde Eshleman, a Washington Boro potato grower said he believes a cooperative could help market produce more efficiently. He cited an example of one chain store rejecting a load of his potatoes without giving any reason for the rejection until the potatoes were back on his farm He felt a cooperative could correct situations such as this, but said some other marketing agreement might work as well He said he believes some control should be placed on the big retailers who are making continually larger spreads between the price to the farmer and the consumer.

Penn State Marketing Agent, Tom Piper, suggested that the group might consider other marketing programs He said cooperative are only one answer to the problem.

Slamp then suggested that some producers might work together without a formal cooperative, and Paul Rowe agreed that this might be a better solution. "We are wasting our time," he said, "If we are thinking of anything less than a cooperative where the growers' identity is lost and all produce goes through a central packaging plant with strict quality control powers."

Dr Martin A Blum, Farmer Cooperative Service U S Department of Agriculture said he had come at the request of Brody and was not there to try to sell the formation of a cooperative, but to offer the technical assistance of his office

Growers, acting on the suggestion of Rowe, agreed by acclimation to work in informal groups on a commodity by commodity basis with the assistance of the county agent's office and Piper

The meeting was conducted by County Agent, M M Smith.

3 to 1

For every dollar invested in limestone, experiment stations say, there is a return of at least three dollars in increased crops. Many times the returns are greater.

It pays to use agricultural limestone! Where else does one dollar bring three in return?

Growing HEIFERS and Dry COWS need

Wayne FITTING RATION

Wayne Fitting Ration produces rugged, full-bodied heifers that are thrifty and ready to breed at an early age. Fitting Ration also helps the dry cow replace flesh lost during the previous lactation and puts her in top condition to start the new milking period at a high level of production.

Bred heifers and dry cows must receive a highly nutritious ration in order to build the unborn calf. Wayne Fitting Ration supplies the vitamins, minerals, proteins and energy needed to drop thrifty, strong-boned calves.

Thirty Nine Awards Presented For Outstanding 4-H Work

Thirty-nine awards for excellence in project work were presented to members at the annual banquet of the three county 4-H dairy clubs last Friday night

In addition, 18 awards in recognition of past winnings were made to members These included awards won at the county dairy club roundup in August and at the Junior dairy show in Harrisburg in Sept

Trophies for all around excellence, as shown by project book scores, were presented to top scorers in each of the five breeds Robert Gregory, representing Miller and Bushong, Rohrerstown, presented the trophies to Donald Trimble, Quarryville R1, James Esbenshade, Quarryville R2, Mary Ellen Mumma, Manheim R1, Averill Royer, 2025 Oregon Pike, and Lucille Kreider, Quarryville R1.

Other high scorers in each club received ribbons and money awards.

Following are the project book awards:

Ayrshire

1 James Esbenshade, Quarryville R1; 2 R. Edwin Harnish Christiana R1, 3 Carl Baldwin, Masonic Farms, Elizabethtown, 4. Marilyn Harnish, Quarryville R2, 5 Judy Flory, Lititz R2, 6. Donna Eshleman, Elizabethtown R1, 7 Linda Eshleman, Elizabethtown R1, 8 Sandra Eshleman, Elizabethtown R1, 9. Paul Brubaker, Lititz R1, and 10 Carol Brubaker, Lititz R1.

Brown Swiss

1. Donald Trimble, Quarryville R1; 2. Joyce Kreider, Quarryville R1, 3. Paul Trimble, Quarryville R1, and 4. Phyllis Hoover, Gap R2.

Guernsey

1 Mary Ellen Mumma, Manheim R1; 2. Elaine Stoltzfus, Ronks R1, 3. Susanne Mumma, Manheim R1; 4. Richard Ankrum, Peach Bottom; 5 Joyce Stoltzfus, Ronks R1, 6. Nancy Bollinger, Lititz R4; 7. Nancy Stoltzfus, Ronks R1; 8 Donald Ankrum, Peach Bottom 9. James Adams, 290 Broad St, Landisville and 10 Forest Preston, Oxford R2

Holstein

1 Averill Royer 2025 Oregon Pike; 2 Gerald Kreider, Quarryville R1 3 Lorraine Harbold, Elizabethtown R1, 4 Linda Lou Welk, Strasburg R1, 5. James Kettering, Lititz R3. 6 Harold Welk, Strasburg R1, 7 Richard Dunn, 2191 Graystone Rd, East Petersburg, 8 John Welk, Strasburg R1; 9 (tie) Earl Stauffer, Ephrata R1, Kenneth Hess, Strasburg R1; Paul Welk, Strasburg R1, and 10. James N Hess, Washington Boro R1.

Jersey

1 Lucille Kreider, Drumore R1, 2 Jean Kreider, Quarryville R1 3 Charlotte Weidler, Quarryville R1; 4. Stephen Arowsmith, Peach Bottom R1, and 5 Nancy Kreider, Drumore R1.

Recognition for past awards was sponsored by a number of agindustrial organizations presenting trophies or prizes. Winners and the persons or groups who sponsored the trophy are as follows:

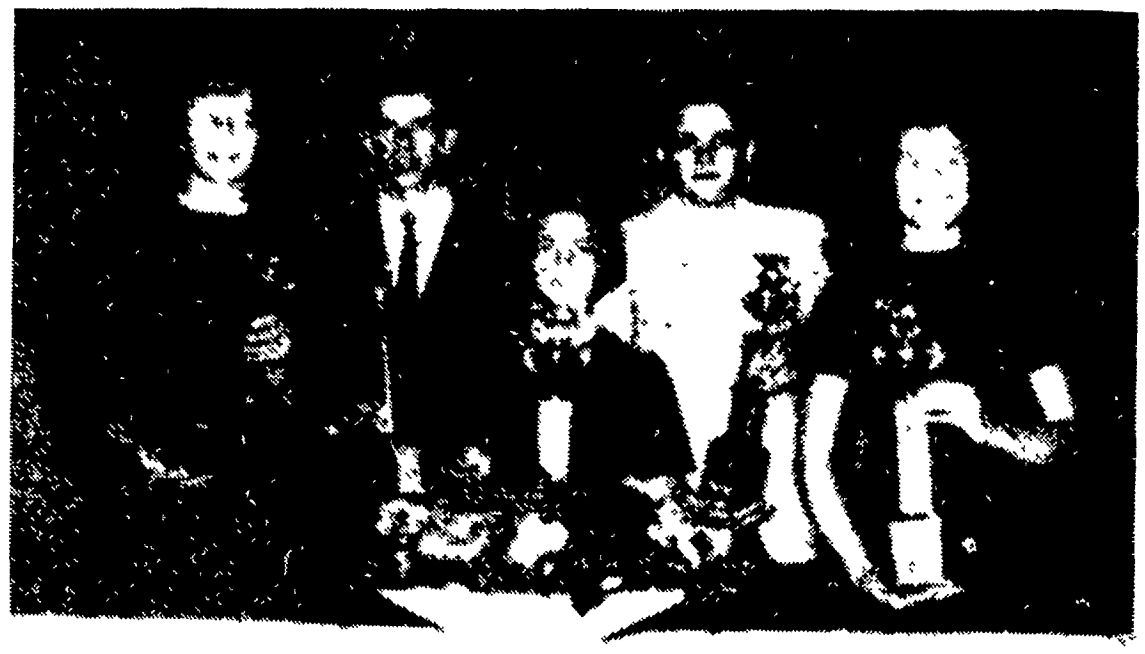
Breed Champions

Ayrshire, Marilyn Harnish, Quarryville R2, Dr. Edward Meisky, Jersey, Stephen Arowsmith, Peach Bottom R1, Interstate Milk Producers; Brown Swiss, Donald Trimble, Quarryville R1; Guernsey, Richard R. Ankrum, Peach Bottom, Martin's Dairy, and Holstein, Averill Royer, 2025 Oregon Pike, Moore Dairy.

Showmanships Champions

Ayrshire, R. Edwin Harnish II, Christiana R1, Lancaster

(continued on page 7)



HIGH SCORERS IN DAIRY PROJECT WORK with the trophies presented by Miller and Bushong, Rohrerstown, at the annual banquet of the county 4-H dairy clubs, and their addresses, scores, and breed of cattle are, left to right, Mary Ellen Mumma, Manheim R1, 93.9, Guernsey; Donald Trimble, Quarryville R1, 94 5, Brown Swiss; Nancy Kreider, Drumore, who accepted the trophy in the absence of her sister Lucille, 95 0, Jersey; James Esbenshade, Quarryville R2, 93.5, Ayrshire and Averrill Royer, 2025 Oregon Pike, 94.6, Holstein. The scores were based on a possible score of 100 points. L. F. Photo.

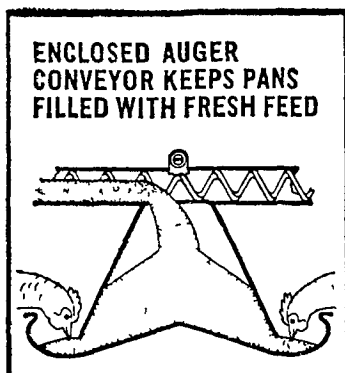
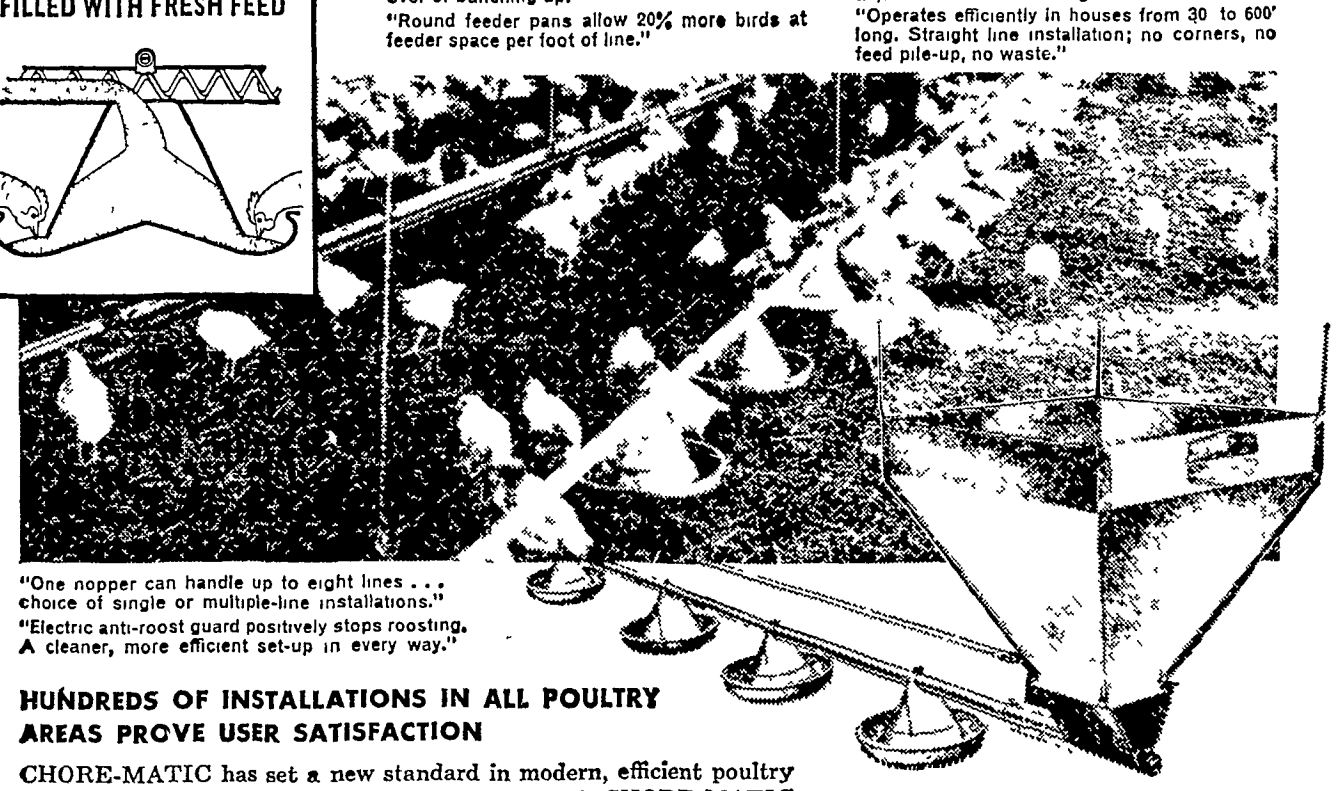
BROILER and EGG MEN ALIKE prove benefits of CHORE-MATIC *Automatic* POULTRY FEEDER

ENCLOSED AUGER CONVEYOR KEEPS PANS FILLED WITH FRESH FEED



"Birds move freely around pans without hopping over or bunching up."
"Round feeder pans allow 20% more birds at feeder space per foot of line."
"As Chore-Matic hangs from ceiling it is easily adjusted for birds of all ages."
"Operates efficiently in houses from 30 to 600' long. Straight line installation; no corners, no feed pile-up, no waste."



"One nopper can handle up to eight lines . . . choice of single or multiple-line installations."
"Electric anti-roost guard positively stops roosting. A cleaner, more efficient set-up in every way."

HUNDREDS OF INSTALLATIONS IN ALL POULTRY AREAS PROVE USER SATISFACTION

CHORE-MATIC has set a new standard in modern, efficient poultry and egg production. Simple, sturdy, dependable! CHORE-MATIC turns on and off automatically to provide birds with fresh, clean feed. No waste, no overflow—a great time and money saver wherever used!

BARBECUED BEEF SANDWICHES go into boxes along with the rest of the meal as members of the Southern Lancaster County Fair association serve real "pit barbecue" beef in a scheme to bolster the finances of the association. Here, left to right are Mrs. John Hershey, Quarryville R1; Mrs Everett Kreider, Quarryville R1, Jason Weaver, Quarryville R1 (in background); Mrs. William Douts, Drumore; Fred Linton, Quarryville R2; Mrs. Grayson Cooper, Peach Bottom, and John Hoffman, Quarryville, president of the Fair Association. L. F. Photo.

MEMBERS OF THE SOLANCO FAIR Association make sandwiches of pit barbecue beef Committee chairman, Jason Weaver, left, stuffs a bun with the succulent roast beef while Fred Linton, second from left, operates the slicer Mrs Pearl Wenger, center, organized the committee of Farm Women to assist with the fund raising venture. She is assisted by Mrs. William Douts. L. F. Photo.

Beef Barbecue

(Continued from Page 1)

man" put in quite a few hours before any beef could be carved

With the assistance of Glenn Keene, livestock extension specialist from the Pennsylvania State University, Frey filled a pit, four feet deep, with wood He lighted a fire and kept it blazing all night long, throwing on more wood as it burned down

When there was a bed of coals about 18 inches deep in the bottom of the pit, long handled rakes were called in to use to level the coals and spread a thin layer of sand over top

The beef, prepared ahead of time by salting, peppering and wrapping in heavy paper and then burlap, was put on top of the sand and the pit covered. First, pipes were put across the pit to support corrugated roofing, and the whole thing was covered over with soil to seal in all the heat and moisture.

From four o'clock in the morning until four o'clock that afternoon, the succulent baby beef simmered in its own juice and the committee just waited.

When the pit was opened, the committee began to sing — or rather swing — into business.

Frey removed the 10 pound packages with a long handled fork, (the heat from the coals was still intense) and cut away wrappings, twine and excess fat. Fred Linton, also of Quarryville R2, manned the slicer and the committee began to make sandwiches for the waiting crowd.

Hungry ticket holders came so fast that Mrs. Pearl Wenger, Quarryville R1, and Mrs. William Douts, Drumore, representing the Farm Women's Societies of the southern county area, had to have some help from barbecue committee chairman, Jason Weaver, in making up sandwiches.

Mr. and Mrs. Everett Kreidder, Mrs. Grayson Cooper, Mrs. John Hershey, Mr. John Hoffman, and Mrs. Martin Greenleaf packed the sandwiches, along with potato chips, cup cake, apple sauce, pickles and orange drink, into the boxes which were carried to homes all over the lower end of the county According to Charles Phipps, treasurer, and John Hershey, the group served just 700 meals by the time the pit was empty.

The beef was part of a steer purchased in cooperation with the Solanco Future Farmers of America from one of the FFA members, Robert Wolgemuth The Members of the fair association and Farm Women Societies donated some of the apple sauce and the cupcakes, but the rest of the material was purchased by the association.

"All the bills are not settled yet, so I can't tell just how successful we were, but it looks like we did all right, and we will probably try it again next year." Hoffman said.

Co. Beekeepers Meet; Sponsor 4-H Roundup

Things were buzzing at 910 State Street, Lancaster, on Thursday night as the 4-H Beekeepers roundup was followed by a meeting of the County Honey Producers Association

Daniel Hershey, the 15 year old son of Mr and Mrs. Elwood Hershey, Lititz R2, won top prize for his project exhibit.

Hershey took 253½ pounds of honey from his four colonies during the past honey season He scored 98 4 out of a possible 100 in his second year project book.

Other placings in the 4-H roundup were as follows. 2, Kenneth Herr, Kirkwood R1, 3, Harvey Heller, 751 Willow Road 4 Roger Stoner, 1051 Eden Road, 5, Garry Porter, Washington Boro R1, 6, William Houser, Lampeter.

Judge of the contest, William W Clarke, extension apiary specialist from the Pennsylvania State University, told county honey producers the honey flow across the state was good, considering the weather, and that the honey market is good.

Clarke cautioned beekeepers to check all colonies for food supplies before cold weather. Each colony should have at least 60 pounds of honey in order to stand the winter.

If the bees do not have a supply of feed, Clarke suggested feeding the bees a syrup of sugar and water.

Auxiliary Makes Apple Dumplin's

An old fashioned apple dumplin bake is being sponsored by the ladies auxiliary of the Mastersonville fire company from 4 to 8 this afternoon

According to Mrs. Ruth Shelly, reporter, there will be take outs of cider, dumplin's, shoofly and apple pies "like mama used to make" "Bring the family and eat yourself full The Apple dumplin s sure eat good," she said.

Guernsey Men Set Banquet For Next Week

A program of awards, election of directors, and a magic act will be featured at the annual banquet and business meeting of he Lancaster County Guernsey Breeders Association next week.

The ham dinner is scheduled to begin at 7 p.m on November 2, in the Rhoad's Spanish Tavern, Quarryville.

The committee has added a series of awards for high milk production from purebred Guernsey cows. The awards will be made during the evening.

Three directors will be elected for a term of three years, and standing committees will make reports.

Entertainment for the meeting will be furnished by John Ziegenfuss of York, president of the Eastern States Magicians Alliance.

Banquet committee members are Charles McSparran, Andrew Burkins, and Robert McSparran.

Children's Clothing

Buy your children's clothing with the same care you use to buy your own, advises Bernice Tharp, Penn State extension clothing specialist Fit is just as important to children as it is to you. In buying for correct fit, look for growth features. That means look for deep hems, partly elasticized waistlines, fullness across the back and chest, and adjustable cuffs.

Furniture Placement

Never place your fine wood furniture where it will be constantly subjected to heat, direct sunlight, or open windows, remind Penn State extension home management specialists. Even when woods have been treated to resist almost anything, it pays to read tags and labels for instructions the manufacturer gives for the care of his product.

● Commissioners

(From Page 1)

surplus food would be determined by the county commissioners on the basis of the present earning power of the applicant

He felt that workers idled by a strike should not be eligible to draw surplus food "If I had felt strongly about it I would have pushed for it during the recent strike in Columbia" The pressure for the program at that time (the strike at Grinnell Corporation) came because strikers on the other side of the river could get surplus food and those on this side could not he said

He estimated the program would cost from $1 00 per person on the eligible lists "We would have to budget $10,000 to $15,000 to begin the program," he said, and added that he felt the program would grow larger. "Once you get it you never get rid of it," he added

A member of Council asked if the program might tend to draw undesirable persons from outside the area to Lancaster County. Snyder declined to say he thought this might happen, and when asked if he thought a surplus food program might have the effect of stimulating or prolonging strikes he said, "That would be pure conjecture, and I would not like to say that would happen."

Snyder said the Department of Employment Security and the Department of Public Assistance would be in a better position than the county commissioners to know the need or number in the county that might be eligible to participate in the program.

Paul Whipple, of Prodution Credit, hosted the meeting which was held in the Association's building on Roseville Road.

Cattle Buyer Sees Great Need For Local Cattle

Southeastern Pennsylvania has the market for more cattle but meanness is the watchword for good prices thirty county agents were told at a luncheon meeting Thursday at the Lancaster Stock Yards

The county agents guests of the Stock Yards toured facilities and heard talks by stockyards officials in keeping with the celebration of Terminal Livestock Markets month during October

Mi't Marshall head buyer for Cross Brothers a Philadelphia packing firm said that only 100 000 of the million federally inspected cattle slaughtered in this market area are fed here

He said his firm is looking for more cattle fed locally, but that packers are looking for a carcass with plenty of meat — not "butterballs" He believes a meat type animal should be produced along the line followed by swine producers in recent years

Marshall said the emphasis on shortness of legs can be overdone Don't be afraid of a few inches of leg if the steer is beefy he said He suggested letting the animal get more growth before putting it on full feed

Marshall said regarding the system of dual grading instituted last summer by the USDA "We will pay more for something if we think it is worth it There is no ceiling Dual grading will have a tendancy to reverse its intended effect setting a ceiling from which cattle will be priced downward

Robert Heilbron, president of the Lancaster Livestock Exchange toastmaster, cited American agriculture and paid tribute to three institutions celebrating their 100th anniversary his year He pointed to contributions of the U S Department of Agriculture, Land Grant Universities and Terminal Livestock Markets

David Buckwalter, Lancaster County farmer and livestock feeder traced the changes in farming habits during three generations on his family farm

In addition to Lancaster County's four agricultural agents — County Agent M M Smith Associate County Agents Victor Plastow and Winthrop Merriam Jr and Assistant County Agent Arnold G Leuck — farm specialists from York Dauphin Adams Chester Schuylkill Northampton, Bucks Berks and Lebanon counties also attended the semi-annual meeting at the Stock Yards Inn.

DAIRYMEN ARE PLEASED — COWS LIKE 'EM!

DARI-PAK PELLETS

NO QUESTION about the ever-growing popularity of Farm Bureau's PELLETED DARI-PAK . . . . it's the talk of Lancaster County. Patron acceptance, of both Coarse Texture and Pelleted DARI-PAK, has been much greater than our fondest expectations. There are many valid reasons why more and more dairymen are switching to "production proven" DARI-PAK. Check the list below - - then call your Farm Bureau FIELDMAN, or phone EX 4-0541, for complete details.

DARI-PAK PELLETS

- Two protein levels, 14% & 16%.
- 100% vegetable protein ration.
- High in Energy content.
- Tasty - full 10% Molasses.
- Nutrients carefully balanced.
- Added Vitamin A and D2.
- Calcium/Phosphorous ratio 1 to 1.
- Made to order — mill fresh.
- Free flowing — very few fines.
- A truly economical grain ration.
- Bulk Discount increases savings.
- Attractive Large-User Discounts.
- Full retail price for your grain.

Start Today . . . Feed the Farm Bureau Way!

Qualified FIELDMEN are anxious to serve and assist you in designing a PROFITABLE DAIRY FEEDING PROGRAM.

Rural-Urban Harmony Is Urged By Farm-City Week Chairman

Agriculture and other industries form an economic partnership second to none. The theme of Farm-City Week to be marked November 16-22, is "Communications."

In the United States, communications between farm and city have always been good, generally speaking, but there is always room for improvement. We would like to do a better job of understanding each other. This is especially important since there is a rapidly growing number of political, industrial and educational leaders who have strictly urban backgrounds You may ask, "What can I, as a farmer, do about better communications?"

We could suggest many things but by all means, tell others your story, tell the good and the bad, too, about farming. Give the other fellow who says he doesn't know anything about agriculture a chance to also tell his story.

There is a real economic partnership between rural and urban interest in this State's vast industrial economy Agriculture and agriculturally-related industries employ nearly a million people We have an estimated 120,000 farms in the Keystone State, plus 5,000 food processing plants, along with thousands of wholesale organizations, retail stores and eating establishments.

Our Commonwealth is a striking demonstration to all Pennsylvanians that neither farm nor city people are really self-sufficient, but rather interdependent.

WHEN YOU ARE READY TO HOUSE YOUR PULLETS!

Pullets moved from range to the laying house find themselves in an entirely new environment, "Strange Quarters", as far as they are concerned.

1. Supply extra fountains around the floor and on the roosts, also feeders.

Some of the birds which looked so nice when you brought them in will have difficulty finding feed and water at first and get uneven and lose some weight unless feed and water consumption is kept at a high level by extra waterers and feeders.

2. Feed #33 EARLY BIRD POULTRY FITTING RATION in hoppers first 2 weeks instead of scratch.

When birds are brought in off range lack of exercise may cause some constipation. Fitting ration helps keep comb color and vigor.

3. When changing to scratch don't have your litter too deep in the house at first.

Scratch in deep litter when pullets are housed is apt to cause a decrease in feed consumption the first few days. Put some scratch in the feeders as well as on the floor at the start.

When chickens are used to their quarters after the first few weeks build up litter gradually to desired depth.

4. If your chickens start to lay on range DO NOT FORGET Oystershells or Calcite Grit.

Without these the birds will draw on her calcium reserve in the bone structure to make the shells. This will eventually result in some weak and poor birds and poor shell quality.

5. Early Bird All Mash Ration or Early Bird Egg Mash and Grain will help you to efficient LOW COST production of quality eggs with just the right yolk color.

If we can be of help to you in any poultry problem, please call your Miller & Bushong representative or dial 392-2145 direct.

NOTE . . .

The care you give your birds during the first month they are housed will largely determine how profitable your flock will be during its laying year.

Low Rail Rates To Continue Through Winter

HARRISBURG — Reduced rail freight rates on hay will be available all winter to Pennsylvania farmers who were unable to bale normal supplies during the drought, W L Henning, State Secretary of Agriculture, said today.

"For the second time the Eastern railroads have responded favorably to our requests," Henning said "First they effected the 25 per cent reduction on hay going to eligible counties Now they have extended the reduction through March 31, 1963"

"All this rain we've been getting lately is of little help to the dairyman and livestock farmer who saw scorched and stunted hayfields all summer," Henning said "Farmers will be importing hay in increasing amounts all winter"

Henning said the hay shipments eligible for the reduced rate must originate in an area roughly east of the Mississippi River and north of the Ohio River and terminate in one of the 55 counties designated as drought disaster areas

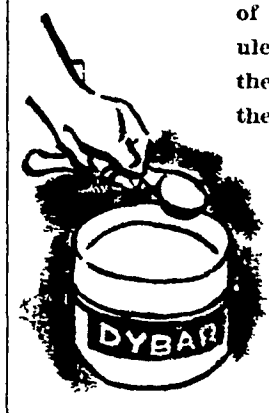
"Assistance on hay shipments is a very helpful companion program to the recently-approved Emergency Livestock Feed Program which will make government-owned surplus feed grains available at 75 per cent of the support price," Henning said.

Strawberries should not be mulched until they have become dormant Four to six inches of straw will prevent heaving of the plants from freezing and thawing.

Don't prune or fertilize your roses this fall (except to remove dead branches) or you may force new soft growth which will winter kill

Du Pont **DYBAR** **FENURON WEED AND BRUSH KILLER**

lets you apply the best brush killer without a sprayer, duster or granular applicator. Just put a few pounds of DYBAR GRANULES in a duffel bag (any old bag will do) and use the spoon which comes with every package of DYBAR for distribution of the granules. Step on them (lightly) to prevent the granules from being washed away by the next rain.



That's All . . . .

Oh, yes, DYBAR works slowly . . expect results after 3-6 months, but the kill will be outstanding, roots and all.

For the Farm Wife and Family

Get In The Pink With Cranberries

By Mrs. Richard C. Spence

Fall and cranberries just naturally go together, so today our recipes are featuring canned cranberry sauce — jellied and the whole sauce At a later date we will devote a column to recipes featuring fresh cranberries

Cranberries are a special treat when used in breads or cakes The following recipes are proof of this

CRANBERRY BRAN MUFFINS

1 cup whole bran cereal
¾ cup milk
1 egg
¼ cup soft shortening
1 cup sifted flour
2-½ teaspoons baking powder
½ teaspoon salt
¼ cup sugar
6 tablespoons whole cranberry sauce

Combine whole bran cereal and milk let stand until most of moisture is taken up Add egg and shortening and beat well Sift together flour, baking powder salt and sugar. Add to first mixture, stirring only until combined Fill greased muffin pans ⅔ full Press 2 teaspoons of cranberry sauce into the top of each muffin Bake in moderately hot oven (400 degrees) about 25 minutes Serve immediately Makes 9 muffins, 2-½ inches in diameter.

CRANBERRY BREAKFAST CAKE

1-½ cups sifted flour
3 teaspoons baking powder
½ teaspoon salt
2 tablespoons sugar
¼ cup shortening
1 egg well beaten
¼ cup milk
1-½ cups corn flakes
¾ cup sweetened cranberry sauce
2 tablespoons butter or margarine, melted
½ cup light brown sugar, firmly packed

Sift together flour, baking powder, salt and sugar Cut in shortening until mixture resembles corn meal Combine egg and milk, add to dry ingredients stirring only until combined Fold in 1 cup corn flakes Spread batter in greased 8 x 8-inch baking pan Spread cranberry sauce evenly over batted Mix together butter, brown sugar and remaining ½ cup corn flakes Sprinkle over cranberry sauce Bake in moderately hot oven (400 degrees) about 25 minutes Cut in squares and serve warm 9 servings

CHERRY PINK BUNS

1 cup sugared corn flakes
1 package refrigerator biscuits
¼ cup honey
2 tablespoons soft butter or margarine
1 teaspoon maichino cherry juice
10 maraschino cherries, quartered

Crush sugared corn flakes slightly Arrange biscuits in greased 8-inch layer cake pan Mix honey, butter and cherry juice Spread over tops of biscuits Sprinkle with sugared corn flakes Arrange cherries over biscuits Bake in moderately hot over (400 degrees) about 20 minutes or until lightly browned Serve immediately Makes 10 biscuits

NOTE Whole cranberry sauce may be substituted for the cherries in this recipe.

CRANBERRY LOAF CAKE

1 17-ounce package cake mix
¾ cup milk
2 eggs
¼ cup sugar
2 tablespoons cornstarch
1 1-pound can whole cranberry sauce
1 tablespoon lemon juice
½ cup chopped walnuts
½ cup softened butter or margarine
3-½ cups sifted confectioners' sugar
⅓ cup cranberry juice cocktail

Prepare pound cake mix according to directions Bake in slow oven (325 degrees) 1-¼ hours Cool Combine sugar and cornstarch Add cranberry sauce, lemon juice and walnuts Cook until mixture thickens and clears Cool Slice cake lengthwise into three layers Spread filling on two layers Stack and top with third layer Frost with Butter Frosting

BUTTER FROSTING

Cream the butter with 1 cup of the confectioners' sugar Add remaining sugar alternately with cranberry juice cocktail Beat until smooth and of spreading consistency. Frost top and sides of cake. Makes 8 to 10 servings.

CRANBERRY REFRIGERATOR PIE

1 cup whole cranberry sauce
½ cup light brown sugar
1 package orange flavored gelatin
1 cup whipped cream (½ pint)
½ cup walnuts, they chopped
Vanilla wafers, about 25

(Note That's right! There isn't any water in this filling).

Mix cranberry sauce and sugar in saucepan Bring to boil. Remove from heat Add package of orange gelatin and stir to dissolve Let cool. Whip cream until stiff Add nuts and cranberry mixture to whipped

(Continued on Page 15)

● Cranberries

(continued from page 14)

cream. Line 9-inch pie plate with vanilla wafers, arranging them around edge, also. Pour in cranberry mixture. Chill thoroughly. Garnish with whipped cream or walnut halves.

CRANBERRY GINGER DESSERT

½ pound ginger snaps
½ pint cream, whipped
1 1-pound can jellied cranberry sauce
¼ cup nuts

Line a pan with a layer of ginger snaps. Beat cranberry sauce with beater and fold in whipped cream. Spread a layer of the cranberry whipped cream mixture over the ginger snaps. Repeat with alternate layers of ginger snaps and whipped cream mixture Top with chopped nuts and let stand in the refrigerator 4 hours or longer Serve in sherbets and, if desired, top with a small amount of whipped cream.

CRANBERRY MACAROON TORTE

3 egg yolks
½ cup sugar
1 cup finely crushed graham crackers crumbs
1 teaspoon vanilla extract
1 teaspoon almond extract
3 egg whites
½ cup sugar
½ cup chopped nuts
1 1-pound can whole cranberry sauce
½ cup brown sugar
1 3-ounce package orange gelatin
½ cup whipped cream

Beat egg yolks gradually adding the sugar, until thick and lemon colored Mix in the crumbs, vanilla and almond extract Beat the egg whites until frothy. Continue beating and add the sugar gradually until the mixture is shiny and stands in peaks Fold into the egg yolk mixture with the chopped nuts Spread into 2 greased 8-inch pie plates or 1 greased 10-inch pie plate

Bake at 350 degrees for 25-30 minutes. Cool In a saucepan, mix together the cranberry sauce and brown sugar. Continue stirring and bring to the boiling point over moderate heat. Remove from the heat Dissolve the gelatin in the hot cranberry mixture and cool until partially set.

Whip the cream. Spread thin layers of the cooled cranberry filling, alternately with the whipped cream on each 8-inch torte shell or the 1 10-inch shell Begin with a cranberry layer and end with a whipped cream layer Recipe will make 10-12 servings

Cranberry Macaroon Torte can be frozen and can be served as a frozen dessert or defrosted to serve Macaroon Torte Shell

CRANBERRY TUTTI FRUTTI

16 single graham crackers
¼ cup butter
¼ cup light brown sugar
1 can (1 pound) whole cranberry sauce
½ cup well drained crushed pineapple
½ cup slivered almonds
1 pint vanilla ice cream
12 paper baking cups

Crush graham crackers to fine crumbs. Melt butter in skillet, stir in brown sugar until dissolved. Remove from heat and stir in crumbs Arrange paper baking cups in muffin pans Sprinkle heaping tablespoon of crumb mixture in bottom of each cup. Save remaining crumb mixture Drain cranberry sauce. Stir in crushed pineapple and almonds Break up ice cream in bowl and beat until soft, but not melted Fold in cranberry mixture and spoon on top of crumbs in baking cups Sprinkle remaining crumbs on top of each baking cup Freeze until hard Serve immediately or wrap individually in aluminum foil and store for later desserts.

The following recipe is a quantity recipe — this will serve 50 people Divide the re-

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

What Is Evaporated Milk?

THURSTON

Evaporated milk is one of several forms of milk available today It is concentrated fresh whole milk that has been sterilized in a sealed can Since it is sterile, evaporated milk needs no refrigeration until after the can is opened Evaporated milk is homogenized to distribute the fat particles evenly.

Do not confuse evaporated milk with Sweetened condensed milk Sweetened condensed milk is used chiefly in making desserts Sweetend condensed milk has sugar added to preserve it

Evaporated milk is packaged in two convenient can sizes — fourteen and a half ounces and six ounces.

Evaporated milk provides the same nourishment as whole fluid milk.

Kinds of Ham Sold Today

Most retail stores today sell only two kinds of ham . . . either fully cooked or cook-before-eating Meat packers are branding hams with one or the other of these terms so that you can tell at a glance what kind you are buying

You can serve fully-cooked ham without further cooking. Or you may heat it When heating, allow twenty-two to twenty-five minutes per pound for a half ham Canned hams are also fully cooked and may be served cold or heated according to taste

Cook-before-eating hams require additional cooking time before you serve them For a half ham, allow fourteen minutes for each pound, and bake at 325 degrees

Help For The Stroke Victim

If you're close to someone who has had a stroke, here's something to keep in mind . relatives and friends play a vital role in helping the patient recover

One key to recovery is the patient's will to get better and a desire to be independent . and the family can encourage

Best Food Buys Food Supplies For School Lunches

This is National School Lunch Week, the first nationwide observance of the program which is helping to provide nutritionally balanced meals for a major segment of our school-age population Subsidized by the Federal, State and local governments, this program supplies one-third to one-half the daily nutritional needs of schoolage youngsters and at the same time provides an opportunity to teach children what they should eat for good health, observes Tom Piper, Penn State Extension Marketing Agent.

Plentiful foods economically priced afford ample opportunities for well-balanced meals at home Foodshoppers will find meat prices holding about steady at the lower levels established last week Special promotion are expected on poultry beef and pork this weekend This will include broiler-fryers pork roasts, chops and hams plus chuck roasts and beef steaks

Cauliflower cabbage beets broccoli celery potatoes, and leafy greens persist as bargain buys Favorable Temperatures once ample rainfall has increased the supply of many of these Fall vegetables Squash, pumpkins and the colorful Indian corn and decorative gourds are in plentiful supply too

Apples remain the center of attraction at the fruit counter as harvesting moves ahead rapidly Harvest of Florida grapefruit is progressing and the crop is estimated to exceed that of a year ago Cranberries, Bartlett pears and Tokay grapes are economically priced

Processed tomatoes, green beans, sauerkraut, corn, peas and spinach are major items from the mammoth new pack that will cost less Rice, cheese frozen orange juice and eggs may be included on the list of items currently in plentiful supply and available at prices which reflect this condition

Stockyards Will Conduct Feeder Sale

The 8th Annual Lancaster Feeder Calf Sale will be held this year in conjunction with National Terminal Livestock Month celebration at the Lancaster Stock Yards, Friday, October 26th, at 1 p.m.

This sale has been growing each year, and offers Good, Choice and Fancy Calves from Penna., Maryland, Delaware and Virginia, Stock Yard officials say.

As in previous years, the steer calves and heifer calves will be graded and sorted for weight Fancy calves will be sold as individuals for club purposes Other consignments will be sold in small and large lots The prospective purchaser will be able to choose the size type and quality he desires

An added feature this year, a market tour for farmers, will be conducted from 9 30-11 30 a m Market-men will have on display and show all types and grades of feeder steers.

Shoppers Vote

Shoppers cast a powerful vote when new food products come on the market, says Catherine Love, Penn State consumer economics extension specialist. Depending on shoppers, a new food either successful and stays around or it drops out of the picture. Many new items are introduced than stay on the market permanently. For every eight items introduced, five disappear because they don't get the consumers' stamp of approval. Also competition for shelf space is keen.

Farmer Survey Shows Mistaken Ideas On Seed Certification

Farmers often neglect to plant high quality seed grain, a research agronomist at the Pennsylvania State University reported during a recent meeting of the American Society of Agronomy in Ithaca, N Y

Guy W McKee of Penn State's Agricultural Experiment Station said a survey of seed grain planted in Pennsylvania indicated farmers often did not know they were planting grain of questionable quality

These farmers used good management practices such as hybrid seed corn, new crop varieties, and improved machines to add to their income, he observed At the same time, they spent up to 20 dollars per acre spraying weeds growing in crop fields

Quality seed would add to the income of these farmers, Dr McKee pointed out Certified seed oats, compared with the poorest seed oats sampled, would have produced an average of 400 bushels of additional grain per farm for nearly $200 above seed costs — from the same 26 acres.

One-third of the farmers felt that seed cleaned over a farm fanning mill was as clean or cleaner than certified seed Three-fourths of the growers were of the opinion that seed cleaned at a local feed mill was as clean or cleaner than certified seed Seed analysis proved both theories false

Still fewer of these growers understood the processes governing the production of high quality seed Many expressed unwillingness to plant oats germinating 70 per cent, but about half had done so. While home-grown oats tended to be low in germination and high in weed content, certified seed invariably was high in quality and purity.

Seed Firm Buys Local Hatchery

Des Moines — The Pioneer Hi-Bred Co of Des Moines announced today that it has purchased the Indian River Poultry Farm of Lancaster, Pa , from George Ellis, the sole owner.

Indian River is one of the larger breeders and producers of broiler males, which are sold to hatcheries as sires for broiler chicks

James W Wallace, president of Pioneer, revealed the acquisition and said that Indian River Farm will become a department of the Pioneer Hi-Bred Corn Co , with Ellis continuing as general manager.

The Indian River operation, which ranks about fourth in size among breeders of broiler males, has a total hatching capacity of 100 000 chicks per week as its three farms Two of them are at Lancaster, Pa , and the other at Ocean View, Delaware The firm presently has 31 fulltime employees and that number will probably be expanded

That business, which was founded in 1935, sells its broiler males in the U. S , South America and in Europe, with the distribution there primarily in Spain and France

Wallace declared that Pioneer is going to throw its research in back of the new acquisition in order to develop improved cockerels.

Robert Arvidson, research director for Hy-Line Poultry Farms, another Pioneer department headquartered in Des Moines, and Hy-Line geneticists Courtney Allen and Merton Hansen have been working with Indian River as research consultants and will continue to do so.

Pioneer breeds and produces Pioneer corn, Hy-Line chicks and Pioneer sorghum and distributes alfalfa

The saving habit is usually worth more than the money thus saved.

State Agency Continues War On Oak Wilt

HARRISBURG — Oak wilt, baffling fungus disease, was found and treated in 386 areas in 15 Pennsylvania counties during the past summer, Dr Thomas L. Guyton, director of the Bureau of Plant Industry, State Department of Agriculture, said today.

Of the 386 known cases, 60 were single infections, involving only one tree, 274 group infections of more than one tree each, and 52 breakover attacks that developed over the boundary of previously treated areas

Trees that had died from the wilt totaled 956 and another 867 were dying when the disease was located Trees cut as a control measure totaled 5,054

Known infection this year was less than in 1961 when the state's control teams fought the disease in 433 areas in 18 counties

A disease known only in the United States, oak wilt was first found in Wisconsin where its fungus origin was determined in 1944. Meanwhile, it has been found in 17 other states, most of them in the mid-western and south vania it was first found in central sections. In Pennsyl- 1950 near McVeytown, Mifflin County. None has yet been located in Lancaster County.

Surveys, mostly with the use of low-flying planes, and control programs have been conducted by the Bureau of Plant Industry each year for the last 12 years Control measures, regarded by Dr Guyton as 85 per cent effective, have consisted of felling diseased trees and treating the stumps with ammate a chemical nonpoisonous to wildlife and livestock Stump treatment kills the roots and checks transference of the disease through root grafts Outbreaks in isolated places indicate, Dr Guyton pointed out that the disease is spread also in other ways, perhaps by spores that are carried by insects or wildlife

In 1940, the average farm worker produced enough food to feed himself and 9 others.

In 1954, he produced enough for himself and 14 others.

Reason: more and better tools, hybrid seed, more knowledge.

Cows Pump Water For Selves With The Aid Of Pasture Pump

What do you do when the spring goes dry in the cow pasture and the milk company says the cows may not wade in the farm pond?

Several farmers around Willow Street have found at least one answer this summer. They let the cows pump their own water from the pond, or, in the case of one farmer, from a shallow well.

The solution to the problem is a device called a pasture pump which will lift water up to 30 feet in height and draw it 300 feet from a stream or pond. But the important feature is the motive force used. The cow pumps the water when she wants it and in the amount she wants.

Ross Frey, Willow Street R1, found his spring drying up during the drought period. He faced the alternatives of bringing his herd of Guernseys to the barn for water and there by threaenting his domestic supply, or finding some way to utilize the old shallow well in the pasture.

The old windmill which once pumped water from the well had long since rusted away and become useless, but the water was still cool and pure.

When a local representative of a farmer cooperative, Wilson Scott, suggested he try a pasture pump, Frey agreed, but "only until the spring came back."

The spring is still dry, and the pump is working perfect, Frey says It took some persuading and a little training before all the cows were pushing the plunger back and forth to pump cool, fresh water into the bowl, but within a week, milk production was back up to normal, and the cows have been using the pump ever since, Frey reports.

One farmer in the area reports he has carried water to his pigs on pasture for years. This year he installed a pasture pump and now lifts the water out of a creek about 200 feet away, and the porkers have a steady supply for the pumping.

Scott says the device is idea for the dairyman who has a farm pond and no convenient way to get the water out to the cows All that is needed is the pump and enough hose to reach the water. The cows supply all the power and they appear to do it eagerly

Other Pictures
On Page 24

The pumps is not a new idea, says Scott, but as far as he knows, there are very few in the county.

HERE IS A PICTURE OF A COW PUMPING WATER for herself. Fence encloses an old well with a worn out windmill standing lonely guard The water was fresh and pure, but the windmill long ago became useless. When the spring in the pasture went dry, Ross Frey installed a Pasture Pump for his Guernseys. They now serve themselves with cool, fresh water whenever they are thirsty. L F. Photo

Farm Loans Are Largely From Banks

Pennsylvania banks were serving farmers with more credit and other financial services than any group of lenders at the beginning of this year, according to Stanley Musselman, Asst. Vice Pres & Manager of the Agricultural Dept of the Lancaster County National Bank, who represents the Pennsylvania Bankers Association as Lancaster County Agricultural Representative

Based on the 21st annual farm lending summary of the Agricultural Committee of The American Bankers Association, Mr Musselman reported that at hte beginning of the year Pennsylvania banks were helping farmers with $204-million in loans, 8 per cent more than a year previous This total included $108-million in production loans and $96-million in farm mortgages At the same time, $11-million in farm loans was held by life insurance companies, $31-million by the Federal Land Banks, $28-million by Production Credit Associations, and $12-million in non-real-estate loans plus $13-million in real estate loans by the Farmers Home Administration About 73 per cent of the production credit extended by lending institutions to Pennsylvania farmers came from banks.

Mr Musselman said that "bankers in Pennsylvania, as well as throughout the country, are taking a realistic look at agriculture, appraising it from the standpoint of its total contribution to the economy Through the years the agriculture industry, as a part of the total economy, has remained relatively stable, with the "off the farm" portion becoming increasingly significant Bankers, therefore, are broadening their services and are developing and promoting programs that consider the interwoven relationships between farmers and related businesses

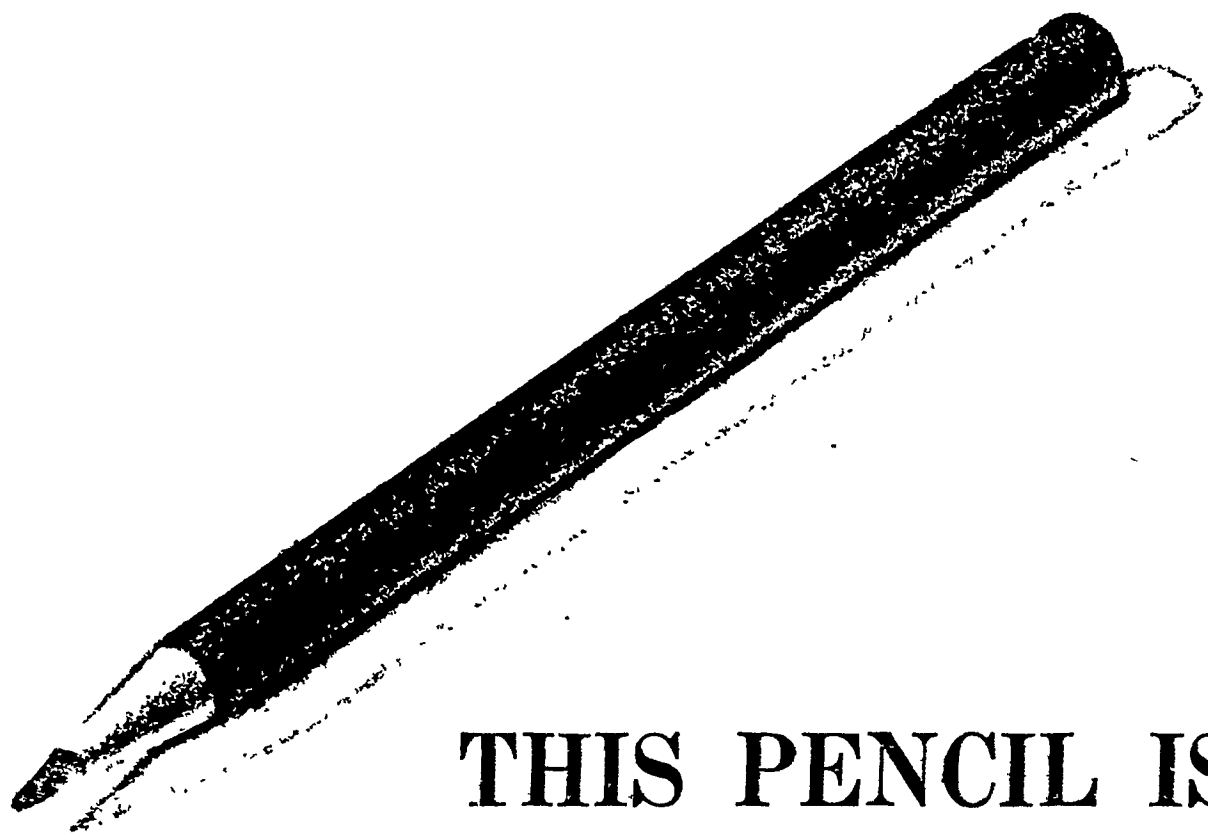
Suffolk Sheep Join Farm Show Committee

HARRISBURG — Admission of the Pennsylvania Suffolk Sheep Association to membership in the Pennsylvania Farm Show Committee today brought to a record 54 the number of affiliate farm organizations that will support the 47th State Farm Show next Jan 7-11, State Secretary of Agriculture William L Henning announced following a committee meeting

The Suffolk breeders, Ford A Cooper, Reynoldsville, RD 2, president, were added to the committee on motion of Charles E Cowan, Lancaster, and Leroy C. Nailor, Jr., Dillsburg, by unanimous action of delegates from the other 53 member organizations. An application submitted by George V. Hunter, Stoneboro, RD 2, secretary-treasurer, listed Milton K Morgan, Lancaster, as vice president They and three others — Robert Kifer, Greensburg, Dr S Philip Laucks, Dallastown, and Carl Everitt, Bloomsburg, RD 5 — are directors.

First entries in the 1963 exposition were reported by John B McCool, Farm Show director Several of the supporting farm organizations requested added space or time for exhibits or educational meetings during the 5-day show.

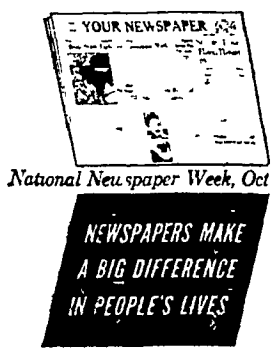


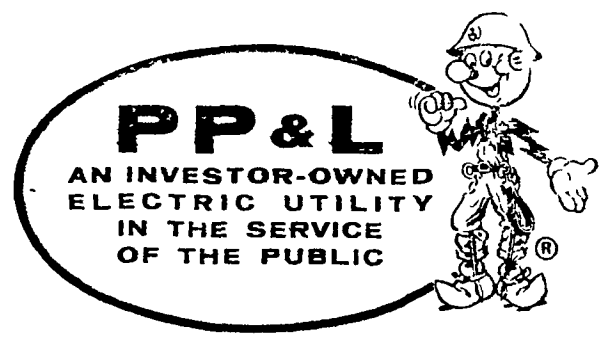
THIS PENCIL IS FREE

A "copy" pencil is an indispensable "tool" of the newspaper trade. It is free—not from a price standpoint, but in a broader and more vital sense. In the hands of the newspaper people of the free world, it writes freely of the events and issues of the day, unhampered, undistorted, uncensored.

Sometimes there are pressures brought to bear on this pencil, blunting the point, blurring the facts. But the point has always been resharpened again. That's why Americans are the world's best-informed people, and it naturally follows, the world's freest.

Your electric company, on the occasion of the National Newspaper Week, salutes the newspapers in its service area for exercising the responsibilities that go with a free press in a free nation.





Hard Fishing Needed To Help Fish Grow Big

Farm pond owners who have put a restriction on fishing in hopes of raising some "Really big ones" may be missing the boat, a zoologist said this week.

Largemouth bass of trophy size are usually found in ponds and lakes where year-around fishing and natural predation remove most of the small and medium sized fish, says Edwin L. Cooper, research zoologist with the Agricultural Experiment Station at the Pennsylvania State University.

Fish counts by Cooper and associates reveal that lakes or ponds, closed to fishing, seldom produce "lunkers" or big ones because of intense competition for food. Natural reproduction, they point out, usually produces too many fish.

"Our experiments show that medium sized and large bass should be harvested continually to make food available for other bass to grow," Dr. Cooper states.

In one study, about 5,500 bass of 5-inch length populated a 3-acre experimental pond in the spring Of these, 4,600 or 84 per cent were removed, leaving 900.

Fish counts in the fall revealed 830 well-fed two-year-old bass, all about 8 inches long. Their total weight was three-fourths that of the entire spring population. Moreover, the 830 survivors had spawned a new crop of fingerlings, making the total fall weight equal to the spring weight

These studies indicate that food is more important than age in determining size A poorly fed bass will seldom get to be 10 inches long in 3 years, Cooper observes. A very well-fed bass could mature at 10 inches in 1 year.

Guam has the highest birth rate of any area of the world with 58 births per year for each 1000 population. (U S average 24 8) (Monaco claims the low record of 14 2 per 1000 population)

SPABC Bull Gets Rating Gold Medal Sire

A Holstein proved sire leased by the Southeastern Penna Artificial Breeding Cooperative has received Gold Medal recognition from the Holstein-Friesian Association of America SH57 Penstate Marksman Reflection becomes the third S P A B.C sire currently in the stud to receive this highest award for proved sires.

Two other bulls in the S P A B C stud have been awarded Silver Medal Type Sire certificates, and a third is a Silgranted automatically when a ver Medal Production Sire. The Gold Medal award is sire is Silver Medal for both Production and Type

The latest official Herd Improvement Registry production summary for SH57 Reflection shows 12 daughters with 17 records averaging 16, 145 lbs milk, testing 4 20% and 678 lbs butterfat (305-2X-M E) This is an increase of 938 lbs milk, 18% test and 66 lbs butterfat over the 12 dams. All daughters included in this summary are currently in the Pennsylvania State University herd at University Park.

The 59th Congress passed 7,024 bills, the 61st 884.

Farm Women 19 Elect Mrs. Dum

Mrs. Samuel Dum, 2191 Graystone Road, East Petersburg, was elected president of the Society of Farm Women 19 at a recent meeting in the Glass Kitchen.

Other officers elected were Mrs Henry Martin, Jr , vice president, Mrs Harold Hollinger, treasurer, Mrs Lloyd Hollinger, assistant treasurer. Reelected for a second term were Mrs Robert White, corresponding secretary, and Mrs Richard Nolt, recording secretary They will be installed at the county convention on Saturday, November 3.

The Society voted to send a $10 donation to a Korean orphan as a Christmas gift.

Mrs Leroy Hottenstein and Mrs Earl Stauffer will represent the society at an extension demonstration of homemade rolls and bread next Tuesday.

Prior to the business session, members entertained guests at the Lancaster County Home with a program of slides, group singing and solo performances. More than 30 members attended.

The next meeting will be held Saturday, Nov. 10, at 1:30 p m at the home of Mrs. Christian Musser, 255 Main St., Landisville. A tea sandwich demonstration will be featured.

Baking Soda Magic

SOFT MOLASSES COOKIES

- 2-¼ cups sifted all-purpose flour
- 1 teaspoon baking soda
- 1 teaspoon ginger
- 1 teaspoon cinnamon
- ¼ teaspoon salt
- ½ cup shortening
- ½ cup sugar
- 1 egg
- ½ cup molasses
- ½ cup water

Sift together flour, baking soda, ginger, cinnamon and salt Cream shortening and sugar until light Add egg and molasses and mix well Add dry ingredients alternately with water, beginning and ending with flour mixture Drop by teaspoonsfuls on to ungreased baking sheet Bake in a moderate oven 375 degrees 8 to 10 minutes Makes about 3 dozen cookies.

PEANUT BUTTER COOKIES· Use recipe above but reduce flour to 2 cups and substitute ½ cup peanut butter for shortening Mix as directed.

* * *

SUNKISSED SPICE CAKE

- 2-¼ cups sifted cake flour
- 1 teaspoon baking powder
- ¾ teaspoon baking soda
- ¾ teaspoon salt
- 1 cup sugar
- 1 teaspoon cinnamon
- ⅔ cup shortening
- ⅔ cup brown sugar, firmly packed
- 1 cup buttermilk
- 2 eggs
- 1 tablespoon grated lemon rind

Sift flour baking powder, baking soda, salt, sugar and cinnamon into a large bowl. Add shortening, brown sugar and buttermilk Mix to dampen flour, then beat 2 minutes. With electric mixer use low to medium speed Add remaining ingredients and beat 1 minute Fill greased cup cake pans ⅔ full and bake in a moderate oven 375 degrees about 10 minutes Let stand about 16 minutes; then remove from pan and cool. Frost with Lemon Butter Frosting. Makes 24 2-inch cakes.

Production records offer the only way to tell the true value of a dairy cow.

P.B. GUERNSEY SALE

Thursday, October 25, 1962
12:30 Noon

At the Ass'n. Sales Pavilion, 6 miles E. of Lancaster on Rt. 30.

50 HEAD - Vaccinated, T.B. and Bang's Certified.

Half of the cattle are a dispersal from a well-known New Jersey breeder - Mulhocaway blood.

Other consignments all fresh or heavy in calf are from well-known farmers who stand back of their consignments. This sale offers a fine opportunity to maintain your fall production and there are undoubtedly real bargains in the dispersal on cows which are not due until later this winter. "Off cows" sell for little above butcher value, but for the man who has the feed to carry them until they come fresh, they are the best investment anyone can make.

The Pennsylvania Guernsey Breeder's Ass'n.
P. O. Box 458, Camp Hill, Pa.

COW BEGINS PUMPING WATER by pushing the lever with her nose Water comes into the bowl as soon as she begins pushing, but she must release the lever to continue pumping L F. Photo

LEVER PUSHED ALL THE WAY BACK gives the cow room to drink the water in the bowl When she moves her nose away from the lever, a spring pushes it back to its original position and brings another inch of water into the bottom of the bowl Cows on the Ross Frey farm at Willow Street R1, learned to use the pump in just a few days and now do not hesitate to use it any time they are thirsty L F. Photo.

CHECKERBOARD

service bulletin

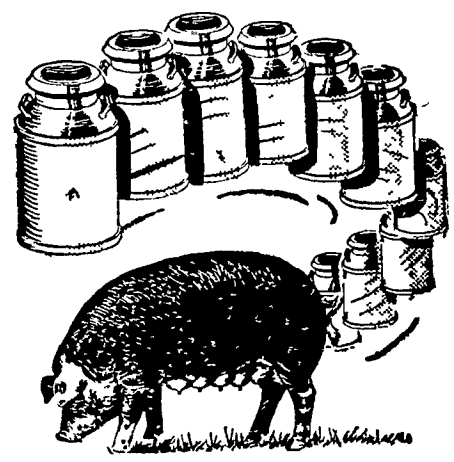
The Cows Said.. YES!

It's the animals who decide for Purina how Chows will look, feel, smell, and taste . . . how they will be made and what they will be made of.

Traditionally, a milking ration had to "look good" . . . contain lots of crimped and rolled grains and be bulky. Almost ten years of work by Purina Dairy Researchers proved this assumption wrong!

A long series of time-consuming experiments began. Traditional "good-looking" ingredients were removed, and the cows responded with up to 2000 pounds more milk per lactation. While dairymen traditionally said "no" . . . the cows said "yes" to this change, and Purina high-energy milking rations came into being. One of these rations is Purina Cow Chow D. We suggest you try it. If you do you'll prove to yourself that Purina feeding costs you less.

Do You Know . . . Sows Produce 100 Gallons Of Milk Each Year



A brood sow is a factory — a "pig factory" — and she needs help to produce to capacity. At the Purina Research Farm on the Purina Hog Program, sows each year produce more than 100 gallons of milk; wean 18 pigs; and maintain their own bodies. These are mighty big jobs.

Purina Sow Chow — fed with your grain — is designed and researched especially for these big jobs. Get Sow Chow at our store with the Checkerboard Sign.

NEW! . . . IMPROVED Purina Fly Checker

Kill flies like magic this summer with new, improved Purina Fly Checkers. They attract flies, then, kill'em in bunches. Just set plenty of Fly Checkers where flies gather around your barn, Pig Parlor, feedlot, poultry house, or home.

Here are advantages to Purina Fly Checkers:

- **ATTRACT FLIES**
- **KILL ON CONTACT**
- **EASY TO USE**
- **LONG LASTING**
- **ECONOMICAL**

Stop in for a six-pak of Purina Fly Checkers . . . at our Checkerboard Store . . . when you're in town. And look over our assortment of Purina Fly Killers — sure death to flies on your farm or ranch.
